

UK HealthCare Markey Cancer Center and Kentucky CancerLink teamed up to provide 14 women with free mammograms. It was a great outreach and we were able to help these ladies get a life-saving screening.

Along with the mammogram, participants also had their nails painted for a little extra "splash of fun" and TLC.

All had a great time, making the day a success. Thank you so much to UK HealthCare Markey Cancer Center staff! KCL appreciates the opportunity to work along side you to make a difference in the lives of women in Kentucky!

The next Mamm's Day Out is scheduled for November 15, 2014. The number of appointments has been increased to 28 and we are looking forward to another great day!

For more information, call Kentucky CancerLink at 859.309.1700.
